Texas A&M University is committed to protecting the health and safety of its employees. Because alcohol and drug abuse is a significant problem in the United States, Texas A&M University is concerned about substance abuse on our campuses. The federal Substance Abuse and Mental Health Services Administration reports that approximately 13.4 million people in the United States have an alcohol problem and 3.2 million have abused or are dependent on illegal drugs. Substance abuse not only disrupts the workplace, but also endangers the lives of those on our campuses.

Alcohol & Drug Program

Texas A&M University formally established an alcohol and drug program to address substance abuse prevention and treatment and comply with Federal Regulations such as the Drug-Free Workplace Act of 1988 and the Omnibus Transportation Employee Testing Act of 1991. The program provides education, early intervention and referral of employees with substance abuse problems. The university rule details who is covered by these Acts and establishes the procedures for random alcohol and drug testing, identifies counseling and support programs available, and specifies the consequences for substance abuse by employees.

Standards of Conduct

All Texas A&M University employees are expected to comply with federal, state and local drug laws as well as System Policies, and University Rules and Procedures. Employees are also required to abide by System Policy 34.02: Drug and Alcohol Abuse, System Regulation 34.02.01: Drug and Alcohol Abuse and Rehabilitation Programs and University Rule 34.02.01 M1: Substance Abuse Prevention. Employees are prohibited from the manufacturing, possession, controlling, selling, transmitting, using, being under the influence or being a party to any illegal drug or controlled substance use on University premises or at any of its activities, including but not limited to University sponsored on or off campus activities and professional meetings attended by employees.

In Texas, 21 years of age is the legal drinking age and when an individual can purchase alcoholic beverages.

Disciplinary Sanctions

An employee who violates any of the System Policies, University Rules and Procedures, local, state or federal laws will be subject to University disciplinary actions, up to and including suspension without pay, transfer, demotion, reduction in salary, termination, and/or referral for prosecution.

Legal Sanctions

An employee who violates any of these alcohol or drug laws will be reported to the appropriate law enforcement agency and will be subject to prosecution in accordance with the law. Legal sanctions for violation of local, state and federal laws may include, but not be limited to: fines, probation, jail or prison sentences.

For subsequent offenses, one may be imprisoned for up to three years and/or fined up to $5,000.00. Under federal law, one may be fined up to $8,000,000.00 and/or may be sentenced from not less than 10 years up to life in prison for trafficking in drugs. For violations of other federal drug laws, one may receive life in prison or the death penalty.

Federal Trafficking Penalties for Schedules I, II, III, IV, and V

Health Risks Associated with the Use of Illicit Drugs and the Abuse of Alcohol

Alcohol abuse is a prime contributor to suicide, homicide, and motor vehicle accidents and deaths. Approximately 150,000 deaths each year can be directly attributed to alcohol abuse. Alcohol and drug abuse can also lead to chemical dependency, premature death through overdose, brain damage, gastritis, anemia, and other physical problems.

The use of illicit drugs can result in a wide range of health problems, including seizures, heart problems, liver diseases, chronic brain dysfunctions, HIV/AIDS, other diseases and infections, and death. Substance abuse can also cause addiction, memory loss, hallucinations, and paranoia.

Alcohol: Effects of use include slurred speech, drowsiness, headaches, impaired judgment, decreased perception and coordination, distorted vision and hearing, vomiting, breathing difficulties, unconsciousness, coma, blackouts, toxic psychosis, physical dependence, neurological and liver damage, fetal alcohol syndrome, vitamin B1 deficiency, sexual problems, cancer, physical dependence

Amphetamines: Also known as uppers, speed, meth, crack, crystal, ice, pep pills. Effects of use include increased heart rate, increased blood pressure, dry mouth, loss of appetite, restlessness, irritability, anxiety, delusions, hallucinations, heart problems, hypertension, irritability, insomnia, toxic psychosis, physical dependence

Barbiturates and Tranquilizers: Also known as bars, bluebirds, blues, yellow jackets, red devils, roofies, rohypnol, ruffies, transq, mickey, flying v's. Effects of use include slurred speech, muscle relaxation, dizziness, decreased motor control, severe withdrawal symptoms, possible convulsions, toxic psychosis, depression, physical dependence
Cocaine: Also known as coke, crack, snow, powder, blow, rock. Effects of use include loss of appetite increased blood pressure and heart rate, contracted blood vessels, nausea, hyper-stimulation, anxiety, paranoia, increased hostility, increased rate of breathing, muscle spasms and convulsions, dilated pupils, disturbed sleep, psychosis, chronic cough, nasal passage injury, kidney, liver and lung damage.

Marijuana/Cannabis: Also known as pot, grass, dope, weed, joint, bud, reefer, doobie, roach. Effects of use include sensory distortion, poor coordination of movement, slowed reaction time, panic, anxiety, bronchitis, lethargy, shortened attention span, suppressed immune system, personality changes, cancer, psychological dependence, physical dependence possible for some.

Morphine/Opiates: Also known as M, morf, duramorph, Miss Emma, monkey, roxanol, white stuff. Effects of use include euphoria, increased body temperature, dry mouth, “heavy” feeling in arms and legs, constipation, loss of appetite, collapsed veins, heart infections, liver disease, depressed respiration, pneumonia and other pulmonary complications, physical dependence, psychological dependence.

Emotional consequences of alcohol and drug abuse are often minimized. These substances can cause personality changes which contribute to problems in dealing with family and co-workers. The personality changes may seriously impair a person and these changes can lead to psychological problems and mental illnesses. Substance abuse may also disrupt effectiveness on the job, reduce motivation, cause legal and financial problems and contribute to social problems.

Counseling Services for Employees

The Employee Assistance Program (EAP) is a confidential source for assessment, problem identification, and referral for a broad range of problems including alcohol and drug abuse. Human Resources provides this confidential service to all benefit eligible faculty, staff, and their family members free of cost.

The EAP is also responsible for administration of the University's alcohol and drug testing program, as well as providing educational material and presentations on a variety of topics including alcohol and drug abuse.

Offices for the Employee Assistance Program are located in the Executive Plaza at 3608 E. 29th, Suite 101, Bryan, Texas. For additional information, email eap@tamu.edu or call (979) 845-3711.
